

VAT Compliance Services

Value-Added Tax (VAT) is a tax on consumer spending. It is a general tax that applies to all commercial activities which involve the production and distribution of goods and the provision of services across the EU.

Whether you are a start-up or a multinational company carrying out activities in a new jurisdiction, understanding the complexity of local VAT legislation and how it relates to your business may be challenging. Non-compliance with the formalities related to the settlement of VAT liabilities may result in additional costs to your business.
